

SCIENCE OLYMPIAD *is for* **Students**

That one thing.

That's what all the guidance counselors and campus tour guides tell students to find. That one thing. A place where you feel like you can be yourself, exercise your unique talents, and find friends who excel in science. That's Science Olympiad.

If you want to be an engineer, a chemist, a biology teacher, an astronaut, an astrophysicist, a math professor, or hey, how about all of the above, Science Olympiad lets you try it on for size. We've got 23 events touching every letter in STEM to allow you to explore any pathway. Science Olympiad helps you find your what, your how, and maybe most importantly, **your why**.

**SCIENCE
OLYMPIAD
IS FOR YOU**

Do you have what it takes to get a \$10,000 Science Olympiad Founders' Scholarship? Scan the QR code to find out about past and upcoming scholarship opportunities!

TOURNAMENTS

Science Olympiad tournaments are a blast, usually held on a college or community college campus, comprised of a full day of teams hustling from home base to labs, gyms and classrooms in pairs and threes to compete in events that test learning, lab and building skills on the spot. Picture a track meet, but for science. The payoff? An awards ceremony in a huge auditorium or stadium, with crowds cheering while you're showered with medals, trophies, scholarships and accolades for your brilliance. Not bad for the college app either.

GIVING BACK

Science Olympiad celebrates the accomplishments of next-gen change-makers who exemplify the spirit of Science Olympiad, from writing a STEM curriculum and hosting summer camps to founding nonprofits committed to hands-on environmental literacy and mentoring. Science Olympiad isn't just a club, it's a community.

Misha Nasarpuri, 2025 Founders' Scholarship winner, is the founder of UpliftHer, a nonprofit launched in 2024 to empower underrepresented women through mentorship and advocacy.

“

Science Olympiad helped me discover my passion for using earth science to promote sustainability and equity, and for blending STEM with community engagement — something I hope to continue in college.

”

JOELLE CHEESEMAN

Science Olympiad 2025 Founders' Scholarship Winner
